

BOHRA ENGINEERING LLP

OUR MOTTO IS
QUEST FOR EXCELLENCE.

WE STRIVE TO MAINTAIN
OUR QUALITY AND TO RETAIN
OUR CUSTOMERS SINCE 1994.

Since 1994, we are engaged in Manufacturing, Wholesale and Exporting of Engineering Goods namely Water Heater Parts, LPG Cylinder Parts, Precision Pressed and Machined Parts. We also cater to the Construction and Paint industries in the Middle East.

Owing to our Quality Standards, Reliability in delivery, we have loyal set of clients (mostly OEMs) in different parts of the Globe such as **Kuwait, Oman, UAE, Qatar in Middle East, USA and other countries in Europe.** Just to flatter ourselves our very first customer is still with us after almost 25 years.

Empowered by strong logistics support, dexterous team, Quality Dept and a rich vendor base, we aim to provide our products without any flaw at the right time.

Global perspective
in manufacturing
will lead to faster
growth in
India's exports.

- Mr. Asgar Bohra, CEO.

Our mission
is to increase share of India's
Global Trade by becoming a reliable
and strong link in supply
chain management.

Our vision
is to create a win win
situation for our suppliers
and customers by adding value in
terms of technical information
and fair dealings.

WATER HEATER PARTS

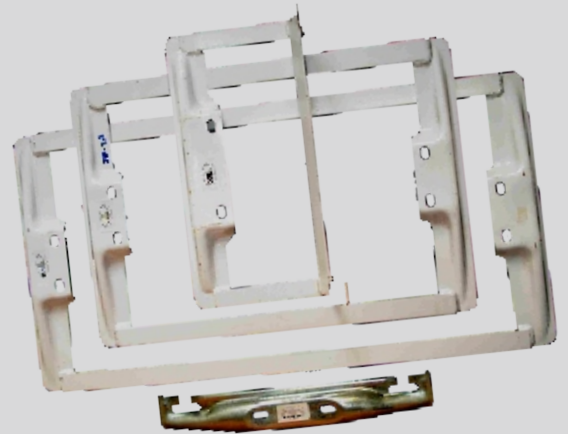

WE SUPPLY ALL

WATERHEATER PARTS

DISH ENDS

- We produce Dish Ends in both Mild Steel and Galvanized Iron (MS & GI).
- Various sizes can be produced as per customized requirements.

MOUNTING BRACKETS

- These brackets are used in supporting the water heaters. We manufacture for both horizontal and vertical orientation.
- Material : MS & GI

HEATER CAPS (CRCA)

- We supply CRCA Caps and Lids in large quantities.
- The lid diameter and number of holes etc. are all customizable.
- They are usually made in Mild Steel.

CLAMPS

- These brackets are used in supporting the water heaters. We manufacture for both horizontal and vertical orientation.
- Material : MS & GI

WE SUPPLY ALL

WATERHEATER PARTS

FLANGE & GASKET

- We mfr Flange / Flange Cover with Rubber gasket for fixing the Heating Element. Usually for Enamelled water tank , flanged type of Heating Element is used We can also provide the T bolts and nuts used for fixing the flange.

HEATER HALVES

- We supply heater halves such that they can later be welded together to form a complete Water Heater Tank.
- Material : MS

SOCKET & FERRULES

- We mfr Sockets and Ferrules on CNC machines as per the drawing dimensions. Socket is used for fitting Heating Element and Ferrule for fixing the Top Safety Valve.
- The material is MS with Galvanized or Blackodized finish We can also supply Copper Sockets. The Rubber O ring for Sockets and Ferrule is also supplied by us

GI PIPES

- Also known as nipples these pipes are used as inlet outlet pipes from the water heater.
- Threading : BSP x 15MM length
- Lengths : 50MM / 90MM / 460MM / 560MM
- Materials also available in : MS & SS

WE SUPPLY ALL

WATERHEATER PARTS

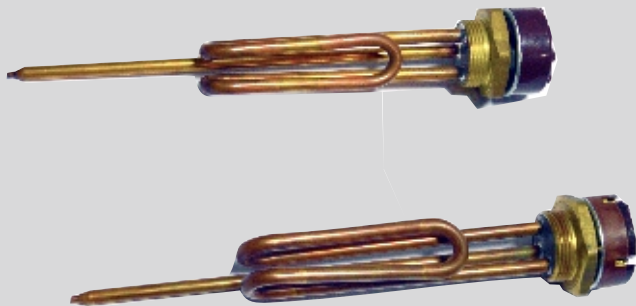

SS TUBES & HOSE PIPES

- We supply GI ERW pipes / Seamless pipes with one side threaded which are used as Inlet outlet pipes These are usually in 1/2" BSP thread in different length.
- We also supply thin walled Stainless Steel SS 304 tubes to be used with plastic sleeve for inlet and outlet pipes. These tubes are with one side flaring for fixing on the nipple.

SAFETY RELIEF VALVES

- These valves are made of brass and are used to maintain the temperature and pressure inside the heater.
- They can be made in other materials also.

HEATING ELEMENT

We manufacture two types of heating elements

- Flange Type
- Screw Type

The product can be made according to customized specifications.

In general the specifications that we work with are:

- Copper Tube
- 8mm dia x 300mm
- 240V / 50hz / 1PH / 1-1 / 4th* thread

THERMOSTAT

- These are stem type cut out thermostats.
- They automatically get on/off in accordance to the variation of the heating temperature and manually make the CKT and are suitable to be used in the water heaters.
- These are known for highly remarkable features like shockproof body, thermal resistant finish, chemical resistant finish and low power consumption.

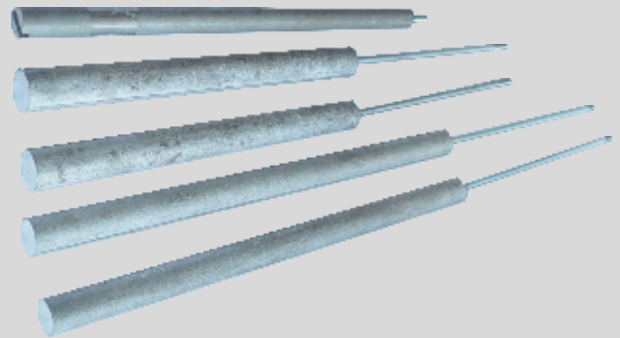

WE SUPPLY ALL

WATERHEATER PARTS

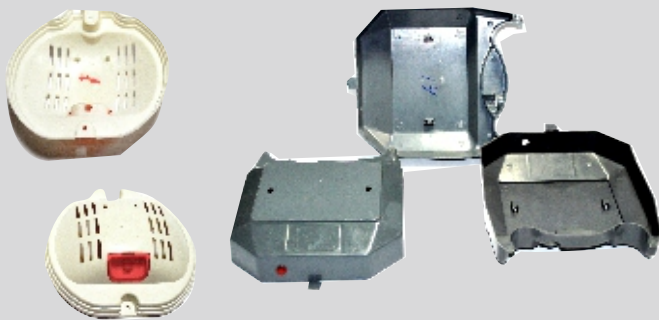

INDICATOR LAMPS

- The Indicating lamp is Neon with Polycarbonate cover and white or black cable fixed with straight or L type Lugs at the end . The cap can be Clip or Butterfly type for fixing on the plastic cap.

MG ANODE

- These anodes are made of magnesium and they are used so that they can protect the water heater from rusting.
- These are available in various shapes and sizes and can be supplied according to requirements.

HEATING ELEMENT

We manufacture two types of heating elements

- Flange Type
- Screw Type

The product can be made according to customized specifications. In general the specifications that we work with are:

- Copper Tube
- 8mm dia x 300mm
- 240V / 50hz / 1PH / 1-1 / 4th* thread

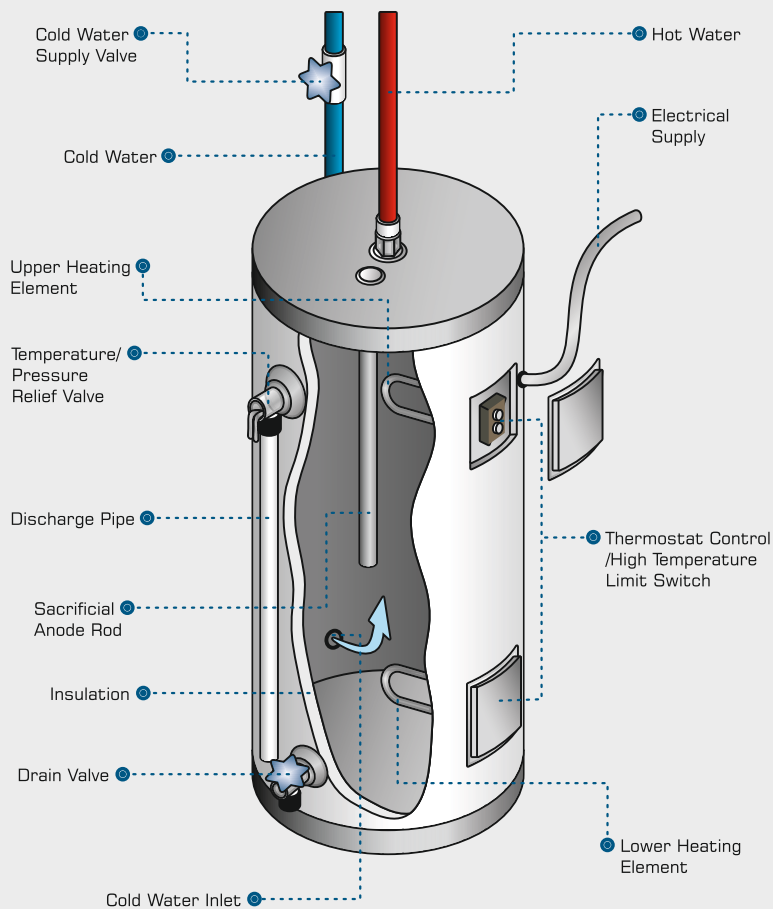

THERMOMETER

- We have thermometers in various shapes suitable for your water heaters. Even various technical specifications can be accommodated.
- The scale is divided into easily legible zones. Also can provide you with your company logo and name on the reading dial if the quality is sufficient.

WE SUPPLY ALL

WATERHEATER PARTS

ELECTRICAL WATER HEATER

WATER HEATER TANK

- We can supply water heater Enamel coated inner tanks in 1.8mm thickness with socket welded. We can also supply heating element & magnesium anode if required.
- We also supply glass lined water heater tanks. These tanks can be supplied with other water heater parts either loose or fitted.
