“The advance of technology is based on making it fit in so that you don't really even notice it, so it's part of everyday life.” - Bill Gates

We strive every-day to develop software which is **easy to understand** and has the **smallest learning curve** so that it becomes an integral part of the organization that uses it.

ABOUT US

Delivering unmatched levels of customer service and solution confidence.

In today's highly competitive marketplace, businesses face substantial pressures to improve product and service delivery, as well as reduce operating costs, specifically in the areas of product development, inventory, material planning, and production management, scheduling, sales and marketing. To successfully compete, these same businesses need to leverage innovative technologies that can bring about the necessary product improvements and cost reductions, and to continue delivering top-quality customer service. For more than 12 years, **Marvel's** technology has provided manufacturers and distributors with one flexible, easy-to-learn solution. The solution offers complete visibility and operational efficiency through a range of business tools that help run a business. **Marvel** takes pride in the fact that we are a technology partner to our customers, without losing sight of the importance of the personal relationship.

We are known for our dedication to both relationships and service. Today, **Marvel** is a well-recognized technology supplier. **MARVEL's** software's combines a broad and powerful feature base of manufacturing, distribution and accounting functionality, simplicity of use, operational visibility, strong analytic and reporting capabilities, exceptional business process modeling and workflow management. Users in a variety of industries report that the utilization of **Marvel's iNven** software drives profit, builds lengthy rosters of satisfied customers and helps gain a competitive edge. **Marvel** remains an industry leader by listening to the needs of customers, anticipating industry and technology trends, and continuously evolving the software's functionalities based upon these needs and trends.

WHO WE ARE

OUR PRODUCTS

With prime focus on product development we have strived even harder to develop software's that can serve large customer base and create our brand value with excellent performance.

iNven – **Inventur**e** **Inventur**e** (M1 Series), a solution that is easy to adopt and intuitive to use, putting you in complete control of your business investment. With more than 350 happy customers iNven has proven its technological capability and precision workability.****

iNven ERP (M2 Series) is enterprise resource planning software currently being developed in house. iNven ERP incorporates the key business functions of an organization. The latest version (iNven ERP 2.0) was made available in mid-2017. Business Processes included in iNven ERP are Operations (Sales & Distribution, Materials Management, Production Planning, Logistics Execution, and Quality Management), Financials (Financial Accounting, Management Accounting, and Financial Supply Chain Management), Human Capital Management (Training, Payroll, e-Recruiting) and Corporate Services (Travel Management, Environment, Health and Safety)

Vikri is an end to end sales point management solution with prime focus to lower down the sales punching time and increase product delivery.

Marvel's VAPT

With online threat reaching at very high levels, **Marvel's VAPT** scans through a website and detects threats precisely and provides with a detailed report with the detection proof, and resolution for the same. With excellent track record of scanning 16 corporate websites for more than a year, Marvel is confident that this product can serve larger corporate community with precision threat detection and excellent reporting system.

“To many, the thought that we are writing software for money cheapens our craft... it cheapens our art. We want to be pure. We want to build perfect products. We want to perfect our craft and be artisans.”

OUR PRODUCTS

With prime focus on product development we have strived even harder to develop software's that can serve large customer base and create our brand value with excellent performance.

TX – Transport Express (Transportation Technology Delivered), a solution for transporting goods from Point A to Point B. With this software, organization can effortlessly manage their shipment, vehicles, and drivers. What's more, with automated email/SMS notifications and full mobile support, logistical operations are guaranteed to be smooth.

AcuteEMS reduces your enterprise energy costs in multiple ways. The system's AI algorithms predict usage trends into the future, so that you can be proactive in reducing demand and saving on energy costs. Power quality email/WhatsApp/Telegram alerts enable quick response to avoid equipment damage and expensive downtime. Predicted peak demand email/WhatsApp/Telegram alerts in advance support demand mitigation efforts to avoid costly penalties. And focusing on facilities and circuits most in need of repair ensures that money is spent where it will have the most impact on the enterprise's bottom line

Spectrobot automates and simplifies task of complex task of sampling and notifying the operations team. It efficiently sends data in real-time to a screen besides your furnace and also can share the same sample data either WhatsApp, Telegram or on Email as well.

Certify is a complete end-to-end Automatic Mill test certificate generation software used by companies to provide authentic production certificates to their clients.

“We love to code because if we can think it, we can make it a reality.”

OUR PROJECTS

Marvel has successfully executed over 60 projects since past 9 years of which some projects are showcased below.

WHY MARVEL

We focus on delivering “excellent value” consistently. Thus we don’t give much thought to being “The Best”.

Strong Process-Driven Approach

- Most activities are managed as a “project” that has pre-determined Tasks and Templates.
- Help Desk is ITSM compliant.

Senior Management Accountability

- Senior Management remains in the Escalation Route.
- Senior Management remains customer facing and intervenes at critical juncture.

Focus on “Business” rather on “Technology”

- We are a Business Automation & Optimization Company that uses IT as an “enabler”.
- We are a Business Automation & Optimization Company that uses IT as an “enabler”.

Fixed Price Approach

- We excel in converting most projects into Fixed Price bids.
- We protect the customer from the risk of cost overrun.
- Budgeting ease renders more critical projects feasible.

Thank you
