Our Stocks

Our Well-Trained Inspection Team Who Inspect Each And Every Items For Cracks And Holes And Give Right Information Of The Size And Weight.

Inner view of our factory.

Process Of Orders Received

1. First Process After Receiving Order Checking Thoroughly For Available Sizes And Then It Will Be Processed In Our ERP Software.
2. After The Material Is Tested And Ultra Sonic Report Is Done Then The Order Is Executed To Our Operators As You Can See In Photo Below.

3. As Per The Order Size In The System The Operator Will Find The Nearest Standard Size Which Is Then Taken For Cutting Process And The Precision Of Cutting Is 1 Mm +/- Which Is Best Part Our Customers Like About Our Services Because They Would Save A Lot In Weight And Machining.

4. After Cutting The Material The Operator Will Clear The Item From His System Which Is When We Know The Material Is Ready.
5. When The Material Is Cut Then It Will Once Again Sent For Inspection And Labelling Of Part No On Each And Every Item Excluding Small Sizes.

6. Finally, It Will Be Taken To The Weight Machine Where Our Professional Staff Will Take The Reading Of Exact Final Weight After Which It Is Delivered To The Company.
7. After The Material Is Ready Our Staff Will Notify The Customer.
