COCERTINA COIL

Concertina Coils, We are reckon as the most eminent Concertina. Coils Manufacturer are based in India. The materials used in the manufacturing of Crossed Concertina Coils are of excellent quality that ensures high durability and resistivity to various corrosive attacks. The Crossed Concertina Coils are also experiencing huge demand in the national as well as international market as these are the best option when it comes to fencing of the walls/fences. Customers are also facilitated with the availability of the Concertina Coils within the stipulated time frame and at the most affordable prices.

INSTALLATION

Concertina coils should only be installed by skilled person because of the nature (lethality) of the product. It can be topped over existing boundaries, chain like fence, weld mesh fence. It requires custom made Y - arms to place the concertina coils or RBT on it. Accessories such as eyebolts/turn buckles are required for installation.

APPLICATION

Concertina coil are used for high security areas such as prisons, borders, factories (for possible theft), Home, warehouses, nuclear facilities, etc.

CHAINLINK FENCE

We have established ourselves among the leading chain link fence manufacturer and chain link fence exporter. We can provide an exclusive range of chain link fences. Chain link fences used for different applications and because of the cost effectiveness and flexibility to use on any types terrain, it scores over traditional brick boundary wall.

However, chain link fence can also be used to increase the height of the existing brick wall by topping it with chain link. Depending upon the uses, one can choose chain link fence made of galvanized steel.

APPLICATION

Chain link fence is used for various applications such as fencing of factories, farms, houses and animal enclosures, roof support, long wall mining, to provide fencing across border to security and effective indoor and outdoor protection around plants and machinery. It can also be used in test area to provide protection against flying objects yet permitting visibility of operation behind screen.

Effective yet non-leather feature makes it useful to use it around playground, school, residential/commercial building, etc. chain link fence can also be topped mounted with lethal razor wires/ barbed wires to make it high security fence.

BARBED WIRE

GUJARAT TRADERS, with the help of providing high quality products has established itself among the leading barbed wire manufacturer, barbed wire supplier and barbed wire exporter. We manufacture and deal in barbed wire for fencing and security uses, made of either hot dipped galvanized stainless steel, or PVC coated wire.

Our barbed wire products have occupied a standard market place and are well accepted by large number of user. When strength and long term durability are blended in optimum way our superior quality barbed wire are born. With our prime objective of customer satisfaction with superior quality product, we always deliver items on time with most competitive price.

APPLICATION

Barbed wire is conventional form of fencing and is widely used for demarcation and low security fencing for areas such as farms house, gardens, open lands etc. Any person or animal trying pass through the fencing line will suffer from discomfort or possibly injury.

G. I. WIRE

Our G.I wire products have occupied a standard market place and are well accepted by large number of user. When strength and long term durability are blended in optimum way our superior quality G.I wire are born. With our prime objective of customer satisfaction with superior quality product, we always deliver items on time with most competitive price.

INSTALLATION

G.I wires are simplest of all to install and erect. It requires only fencing posts, barbed wire and fixing accessories such as staples/pins and hence even an unskilled person can erect the fence quickly.
