# ALUMINIUM

A stylish home is always preferred and hence, aluminium doors and windows give that enhanced look, also being highly resistant, sturdy and attractive in compatibility to the overall furniture and fittings.

# DOORS AND WINDOWS

# UPVC

# DOORS AND WINDOWS

UPVC is one of the most ideal low maintenance framing and profiling material, which not only gives a finished appearance but is also Heat resistant, doesn't catch dust easily and lastly, is energy efficient and costs low.

## VENEER

Veneer, a wood working material, is a thin wooden slice of less than 3mm, often used as table tops and doors, etc.

## LAMINATES

Laminates are artificial composite material which have exceptionally wide uses and can be used from fancy flooring to contemporary furnishings too.

## PLYWOOD

Plywood is engineered wood, known for its dimensional stability, also providing stiffness to the furniture.

## FURNITURE HARDWARE

Furniture Hardware are all types of fittings used in support/provide stability such as hinges, handles, angles, etc

## TOUGHENED GLASS

Toughened Glass is a type of safety glass, it can be seen in offices, or on things used in regular basis due to its highly break resistant nature.

## DESIGNER GLASS WORK

Designer Glass Work is a cherry on the cake (glass). A glass face changing game as it makes it appear fancy, eye-catching and modish!

## GLASS RAILING SYSTEMS

You may find Glass Railing systems in the balcony, or in malls. They can be made in aluminium and steel and gives a supreme facade image to the overall architecture.

**Aluminium  
Railing System**

**S.S 304 PVD  
(Gold/Rose Gold)**

**Wooden  
(Burma teak / Sagwaan)**

**Regular S.S 304  
Railing System**

# HARDWARE

It comprises of all the general tools & hardware basically used for the proper functioning and strengthening of the fittings of Aluminium sliding doors/windows and Glass fittings. For eg. Screws, nuts, bolts, fasteners, etc.
