INTRODUCTION:

We are Pleased to introduce ourselves as **SAME (SAIF AL MUFADDAL ENTERPRISE)** with **GSTIN # 24AHPS3519E1ZG** one of the leading General Contractor and Trader in the south Gujarat.

SAME for contracting, Industrial trading and Maintenance Services has the capability to perform all types of contracting services with high quality workmanship in the different fields.

IT has been establish with Head Office and Warehouse in SURAT

❖ Projects / Services / Maintenance

- *Licensed Electrical Contractor*
- *Residential, Industrial & Commercial Projects*
- *Electrical Installation, Operations & Maintenance Works*
- *Heavy Industrial/Commercial 3 Phase / 1 Phase Works*
- *Designing & Manufacturing of HV/LV Power/Control Panel as per client requirement*
- *Interior Designing, POP Ceiling, Carpentry, Electrical Wiring, Lighting and Missionary works (Home Automation Works)*
- *Cable Tray, Slab Conduit, Casing Capping & Surface Piping Works*

❖ Maintenance of Equipment

- *Maintenance/Modification, Installation and commissioning of Over Head Cranes.*
- *All types of Machineries like CNC Machines, Shearing, Rolling, Bending Shot Blasting Band Saw, CNC Plasma and Lathes.*

❖ Capital Equipment

- *Manufacturing and Designing of Industrial Cranes – EOT, Jib Cranes, Gantry Cranes, Hoists and Chain Pulley Blocks*
- *Shrouded Bus Bar System DSL Line and Festoons*
- *Brakes Liner for all types of brakes Motors*

❖ Consumables /Trading

- *Spare Parts for all types of Cranes and machineries*
- *All Types of Precision and Special Bearings*

SAME has the experience to safely deliver superior results even in the most challenging environments. We support clients with our Local Representatives for faster speed of response. These representatives are well equipped with knowledge of products and technical expertise to attend to technical queries and service requests.

CAPITAL OF EQUIPMENTS

CRANES MANUFACTURING

❖ Bridge Cranes

Single Girder EOT Cranes

Span: 3 to 30 Meters

Safe Working Load: 500 to 20,000 Kgs

Double Girder EOT Cranes

Span: 5 to 85 Meters

Safe Working Load: 500 to 200,000 Kgs

Bridge cranes are one of the most popular type of overhead crane in the market. A bridge crane have two overhead runway beams, which are connected to the building's support system. This crane is available in Single and Double girder Configurations. A Single & Double girder bridge crane has same strength. On the other hand, Single Girder are design for low capacity, Double girder crane are design for Higher capacity and can lift a load higher than a single girder crane.

Single Girder vs Double Girder Bridge Cranes

A single girder or double girder is a type of overhead crane that of which configuration is available for an overhead bridge crane. A bridge girder, also known as a beam, is the structural support that allows the trolley and hoist to travel from side to side along the bridge. Before lifting or lowering a load, the trolley is use to precisely place the hoist.

Both single and double girder cranes are solid and durable to some extent. The most significant difference between the two is hook height, or how high your hoist can rise off the ground. Since the hoist is mount on top of the girders rather than below them, a double girder crane may have more hook height.

❖ Goliath(Gantry) Cranes

Semi Goliath Cranes

Span: 5 to 20 Meters
Safe Working Load: 1000 to 30,000 Kgs

Goliath Cranes

Span: 5 to 50 Meters
Safe Working Load: 1000 to 100,000 Kgs

The gantry crane girder sits on legs rather than being suspended on a support beam. The legs can be installed either underground or on top of the ground. Since the girder does not need to attach to a building's support system, gantry cranes are ideal for outdoor use. A gantry is the type of device to be used in a shipyard.

❖ Jib Cranes

Radius: 2 to 6 Meters
Safe Working Load: 250 to 5000 Kgs

A jib crane is a type of overhead crane that does not have a runway system; instead, it attaches to a wall and extends its boom over the coverage area. These overhead cranes can also be freestanding, which means each structure has its own support column. This crane swings from 180° to 360° in a circular motion. A jib crane can lift loads of up to several tons despite its small footprint.

❖ Cage Hoist Arrangement

Floor Level Ground Level+10
Pay Load Capacity 500 to 5000 Kgs

❖ Hoists

Flame Proof Hoists

Safe Working Load: 250 to 25000 Kgs

Wire Rope Hoists

Safe Working Load: 500 to 25000 Kgs

Chain Pulley Blocks

Safe Working Load: Capacity up to 20 Tons

Chain Hoists

Safe Working Load: 500 to 2000 Kgs

❖ Features of EOT Cranes

EOT (Electric Overhead Traveling) Cranes are different from other types of overhead cranes because of their unique features:-

1. It has a heavy-duty cast steel rope guide.
2. It has a sturdy construction.
3. It is easy to operate with low maintenance.
4. It also consists of an upper and lower hook travelling limit switch.
5. The motors of EOT cranes are TEFC motors with F class insulation. TEFC here stands for totally enclosed, fan closed.
6. It is also corrosion-resistant.

❖ Application of EOT Cranes

EOT cranes have wide applications and used in many industries. Some of them are

- | | |
|--------------------------|--------------------------------|
| ➡ Power Plant | ➡ Ceramic industries |
| ➡ Transport Industry | ➡ Dairy Industries |
| ➡ Construction Industry | ➡ Steel Fabrication Industries |
| ➡ Petrochemical Industry | ➡ Textile Industry |
| ➡ Chemical Industries | ➡ Cement Industry |
| ➡ Steel Plant | ➡ Foundries |

CRANES MAINTENANCE SERVICES

WE UNDERTAKE COMPLETE MANUFACTURING, REPAIR AND MAINTENANCE CONTRACTS FOR OVERHEAD CRANES.

- ➡ Modernization of EOT Cranes
- ➡ Servicing of EOT Cranes
- ➡ AMC for EOT Cranes
- ➡ Rail Alignment of EOT Cranes
- ➡ Revamping of EOT Cranes
- ➡ DSL Alignment
- ➡ Reconditioning of EOT Cranes
- ➡ Maintenance of EOT Cranes
- ➡ Designing of Power & Control Panel
- ➡ Structure Steel Fabrication
- ➡ Installation, Commissioning, Testing of All Type of Industrial Machineries and Equipment with Civil, Mechanical and Electrical Work
- ➡ Overhauling of EOT Cranes
- ➡ Erection/Dismantling of EOT Cranes
- ➡ Repair of EOT Cranes
- ➡ Health Check Up of EOT Cranes
- ➡ Up-gradation of EOT Cranes
- ➡ Gantry Alignment Readiness
- ➡ Refurbishment of Old Cranes of Any Make
- ➡ Erection and Commissioning of Rails
- ➡ Installation & Termination of Power/Control Panel
- ➡ Structure Steel Erection Work
