Corporate Background

- Tremex Pest Services Pvt. Ltd is Mumbai's locally owned commercial and residential service solution provider of innovative pest control services and techniques making our service to you more effective, safer and convenient. We provide essential proactive pest elimination services to residential, commercial, industrial customers.
- Tremex Pest Services brings a higher level of professionalism to the pest control industry. We are a growing outfit, staffed with industry experienced pest management professionals. Our professionally staffed technical department and consulting advisors works hard to research and develop new processes and methodology to better serve your needs and provide you value.
- Our clients recognize our Quality Assurance Department as a valuable resource, not only for identifying problem pests and methods of safe control, but also for the Research and Development that we provide for the industry in general and for the public good.
- Our mission is to provide our clients with the highest level of pest control service in a cost-effective manner that minimizes risk potential and delivers the highest level of customer service. You will always receive quality service, staff expertise, image protection and return on your investment. Our success is your success!

A Commitment to Excellence

- Tremex Pest Services is dedicated to ensuring our clients receive superior custom tailored programs, documentation and support. We're always looking for smarter ways to manage pests.
- Our policies are our commitment to provide you with peace of mind purchasing. Whether it's our 24 hour service guarantee or procedures and regulations, Tremex Pest Services continues to lead the industry in customer support and documentation expertise.

Safety of the Environment

- It has long been the philosophy of Tremex Pest Services that pest control goes far beyond mere application and use of pesticides. To this end, we continually offer education and training to those concerned with non-chemical measures which will reduce the need for pesticide usage.
- As pest control and elimination are critical to the integrity of a safe working environment and integral to Tremex Pest Services fulfilling our clients' satisfaction, some pesticide usage may be deemed necessary as a practical avenue for control.
- When selecting control measures, we at Tremex Pest Services take a holistic approach and only include pesticides and methods which will require minimal usage of chemicals, which have been carefully scrutinized by regulatory agencies both for their effectiveness and environmental impact. Through our support of international collaborations, research and development, we continue to keep abreast of the latest technologies of control measures and alternative products to satisfy our clients' needs.

Personnel Training/Service Research and Development

- All Tremex Pest Services employees undergo regular training and certification to assure service is delivered to the complete satisfaction of the customer. Under no circumstances an untrained person will be utilized for the specific job. Training includes:
- Treatment techniques that conform to International standards, assuring the most effective pest control program available.
- Training in Good Manufacturing Practices (GMPs), Hazard Analysis Critical Control Point (HACCP) protocols specific to various industries, and central, state and local regulatory requirements.
- Tremex Pest Services training is unique in the industry. Tremex Pest Services training focuses on new and innovative pest management strategies and emphasis on inspection and identification of contributing factors. The other major area of training emphasis is problem analysis and selection of the most appropriate pest management strategy.
- We set a new standard in efficient service, effective products, application techniques, and the experience to deal with every possible pest problem. It's our people, products and service that create better results. Our plan is to continue building on our foundation of introducing innovative products and services and providing top quality technical skill and knowledge.

Quality

- Tremex Pest Services is committed to providing the highest quality, most effective pest control and other related services to industry, government and homeowners. At all times, our people will demonstrate that serving the client's requirements is our number one priority. Tremex Pest Services unique and comprehensive approach for customers supports quality on-site service with an entire team of experts who develop and monitor your Integrated Pest Management solution.
- In our company, quality service is everyone's business. Our primary objective and utmost desire is to satisfy each client individually. We will strive to continuously improve our service delivery in order to meet every client's requirements. We believe that potential and existing clients will respond favorably to us when we courteously provide a quality service at every client contact, and exhibit pride in our work and in our company. We also participate in client awareness programs so that the pest management starts at the right footing and continuously improve. As a mark of our commitment to quality, we have set high standards for evaluating our work, reinforcing and developing employee knowledge, and verifying our clients' level of satisfaction. Our Quality Assurance Team is committed to provide periodic service audits to evaluate the progress recommend necessary alteration as needed and constantly optimize your ongoing pest management program.

- **A “pest”?**
- “Pest is any living organism that is detrimental to the development of human beings” OR
- “Is any living organism, that is detrimental to the welfare of mankind (Man, crop and pets)”
- **Pest management**
- “Pest Management is a business of technology”
OR
- “Pest Management is a process by which the pest population is maintained below thresh hold limits by which economic losses can be prevented”
OR
- “A system integrating preventive and corrective measures to keep pests from causing significant problems.”
